1643543471	B30F	498245		BW35

Den sjunde siffran 1, 2, 3, 4, 9, i typbeteckningen anger följande:

1 = Vänsterstyrd
2 = Högerstyrd
3 = Vänsterstyrd, USA exklusive Californien
4 = Vänsterstyrd USA endast Californien
9 = Högerstyrd, monteras i Australien, Malaysia och Sydafrika.

The seventh digit 1, 2, 3, 4, 9, in the type designation column means:

1 = Left-hand drive
2 = Right-hand drive
3 = Left-hand drive USA except California
4 = Left-hand drive USA California only.
9 = Right-hand drive, assembled in Australia, Malaysia and South Africa.

Le dernier chiffre 1, 2, 3, 4, 9, du code de désignation se réfère à ce qui suit:

1 = Direction à gauche
2 = Direction à droite
3 = Direction à gauche, Etats-Unis non compris Californie
4 = Direction à gauche, Etats-Unis, seulement Californie
9 = Direction à droite, est monté en Australie, en Malaisie et en Afrique du Sud.

Die 7 Ziffer 1, 2, 3, 4, 9, in der Typbezeichnung bedeutet:

1 = Mit Linkslenkung
2 = Mit Rechtslenkung
3 = Mit Linkslenkung, USA ausschl. Kalifornien
4 = Mit Linkslenkung, USA nur für Kalifornien
9 = Mit Rechtslenkung, in Australien, Malaysia und Südafrika zusammengesetzt.

La sexta cifra 1, 2, 3, 4, 9, en las especificaciones de tipos se refiere a lo siguiente:

1 = Dirección a la izquierda
2 = Dirección a la derecha
3 = Dirección a la izquierda, EE.UU. excl. California
4 = Dirección a la izquierda, EE.UU. solamente California
9 = Dirección a la derecha, se monta en Australia, Malaysia y Sud Africa.

Katalogens uppbyggnad

Katalogen är indelad i de grupper, som framgår av registerbladet. I början av varje grupp finns en innehållsförteckning. Ett numeriskt register samt förteckning över reparationssatser är placerade i slutet av katalogen. Registerbladet, innehållsförteckningar samt förteckning över reparationssatser är fem-språkiga, (svenska, engelska, franska, tyska och spanska).

Katalogens användande

Om man vet var en detalj är placerad och vill ha reda på dess detaljnummer etc, går man till den grupp i vilken detaljen skall finnas upptagen. Med hjälp av gruppens innehållsförteckning söker man sig fram till den sammanbyggda enhet, vari detaljen ingår. Obs! Olika varianter av samma aggregat kan förekomma. När man på bildsidan funnit detaljen och därmed detaljens pos-nr, går man över till samma pos-nr på motsvarande textsida, där data erhålles för beställning av detaljen. Om man endast känner till en detaljs nummer och vill ha övriga data för beställning, går man till nummerregistret. När man i registret funnit detaljens nummer, får man på samma rad hänvisning till en viss grupp, sida samt fiche-koordinat. Hänvisningen leder till den textsida, på vilken detaljnumret återfinnes i kolumnen, "det nr". På samma rad som detaljnumret finner man övriga data för beställning.

Genom att från detaljens pos-nr gå över till samma pos-nr på motsvarande bildsida får man veta detaljens placering och dess funktion i den sammanbyggda enheten.

Vad man bör veta om textsidan

Textsidan är uppdelad i ett antal kolumner benämnda enligt följande: 1. **"Pos"** Positionsnumret utgör sambandet mellan en detaljs beställningsdata på textsidan och den på bildsidan illustrerade detaljen. 2. **"Antal"** Här anges antalet av en viss detalj inom den närmast högre enheten. Detaljer, som lagerföres per längdenhet, rör och slang etc, anges enligt följande: Fr o m 1—99 millimeter "99MM" och fr o m 100 millimeter och däröver "100". För rör eller slangar med samma dimension, vilka förekommer på ett flertal ställen inom samma installationsgrupp (bildavsnitt), anges i vissa fall längderna även på bilden. Längderna skrivs då inom parentes och i omedelbar anslutning till positionsnumret. 3. **"Det nr"** Detaljnumret skall oavkortat användas vid beställning. 4. **"Benämning"** I denna kolumn anges den benämning som skall användas för detaljen ifråga vid beställning. Benämningarna är angivna på såväl svenska som engelska språken. Om en viss detalj ingår i en högre sammansatt enhet är detaljens benämning stegförskjuten åt höger i förhållande till den sammansatta enhetens benämning. Vid köp av den sammansatta enheten medföljer de detaljer, som är stegförskjutna till höger i förhållande till den sammansatta enheten.

5. **"Sats"** Siffrorna 1—4 i satskolumnen anger respektive reservdels "lagerhållningsgrad". Siffran 1 avser högsta lagerhållningsgraden, vilket innebär att detaljen i **första hand** bör lagerhållas. Angelägenhetsgraden sjunker med varje tal till 4. Ej klassificerade delar bör endast lagerhållas om dokumenterad förbrukning föreligger inom distriktet. 8 = Anger att detaljen ej säljes separat eller som reservdel. O = Anger standarddetaljer (skruv, mutter, bricka) som bör lagerhållas. Detaljer märkta med O faller under lagerhållningsgrad 1. S = Anger att detaljen ingår i reparationssats. Sådana detaljer skall endast i undantagsfall lagerhållas separat. I den mån det varit möjligt, har satsernas komplettnummer inredigerats i det avsnitt eller grupp där de har sin konstruktiva plats. I de fall det icke varit möjligt att visa reparationssatsen med ingående delar direkt i texten, har satsens kompletta nummer upptagits sist i varje textavsnitt. Går man exempelvis till grupp 6 framaxel, styrning och söker detaljer för byte av spindelbult, finner man att spindelbultens detaljnummer är märkt med ett "S". Satsen återfinns då vanligtvis sist i samma text- och bildavsnitt. 6. **"Anmärkning"** Förutom sidhänvisningar innehåller denna kolumn förtydligande uppgifter av olika slag. Ett i denna kolumn med klammer omslutet detaljnummer anger att detaljen ersatts av numret i detaljnummerkolumnen. Denna ersättning gäller endast berörd katalog och pos. Anmärkningar, som av utrymmesskäl ej kan skrivas i anmärkningskolumnen, har i denna kolumn markerats enligt följande exempel: 1, 2, 3) osv. Dessa anmärkningssiffror börjar med nr 1 inom varje kataloggrupp och återfinnes som fotnoter sist i varje avsnitt. I fotnoterna skrivs anmärkningarna på svenska, engelska, franska, tyska och spanska. Ett "X" i textsidans vänstra marginal markerar var ändring ägt rum vid senaste sidbyte.

Vad man bör veta om bildsidan

Bildsidans illustrationer utgöres som regel av perspektivteckningar. I vissa fall används plan- och sektionsbilder från ritningsunderlaget. Stegförskjutningsprincipen, se textsida punkt 4, kan man även spåra i bilden på så sätt, att komplettdetaljs pos-nr med en klammer omsluter underdetaljernas. Komplettenhet markeras även med en ring omkring ett pos-nr.

Vad man bör veta om registret

Gruppen "register" är indelad i två undergrupper, "nummerregister" samt "reparationssatser", vilka här nedan behandlas var för sig.

Nummerregister

Nummerregistret är uppställt i tabellform. Varje sida är indelad i spalter och kolumner: "Det nr", "Grupp", "Sida" och "fiche-koordinat". Nummerregistret kommer särskilt till användning då man endast vet en detaljs nummer och vill ha övriga beställningsdata. För att finna ett visst nummer i registret går man till kolumnen "Det nr". Detaljnumren är upptagna i nummerordning. På samma rad som detaljnumret finner man hänvisning till den grupp och sida i katalogen, eller den fiche-koordinat, där ifrågavarande detalj kan ses i sitt sammanhang. I de fall en detalj förekommer på flera ställen i katalogen, skrivs detaljnumret endast en gång och samtliga förekommande grupp- och sidnummer eller fiche-koordinater utskrivs därefter. Om en detalj förekommer flera gånger på samma sida, utskrivs detaljnummer, grupp, sida och fiche-koordinat endast en gång.

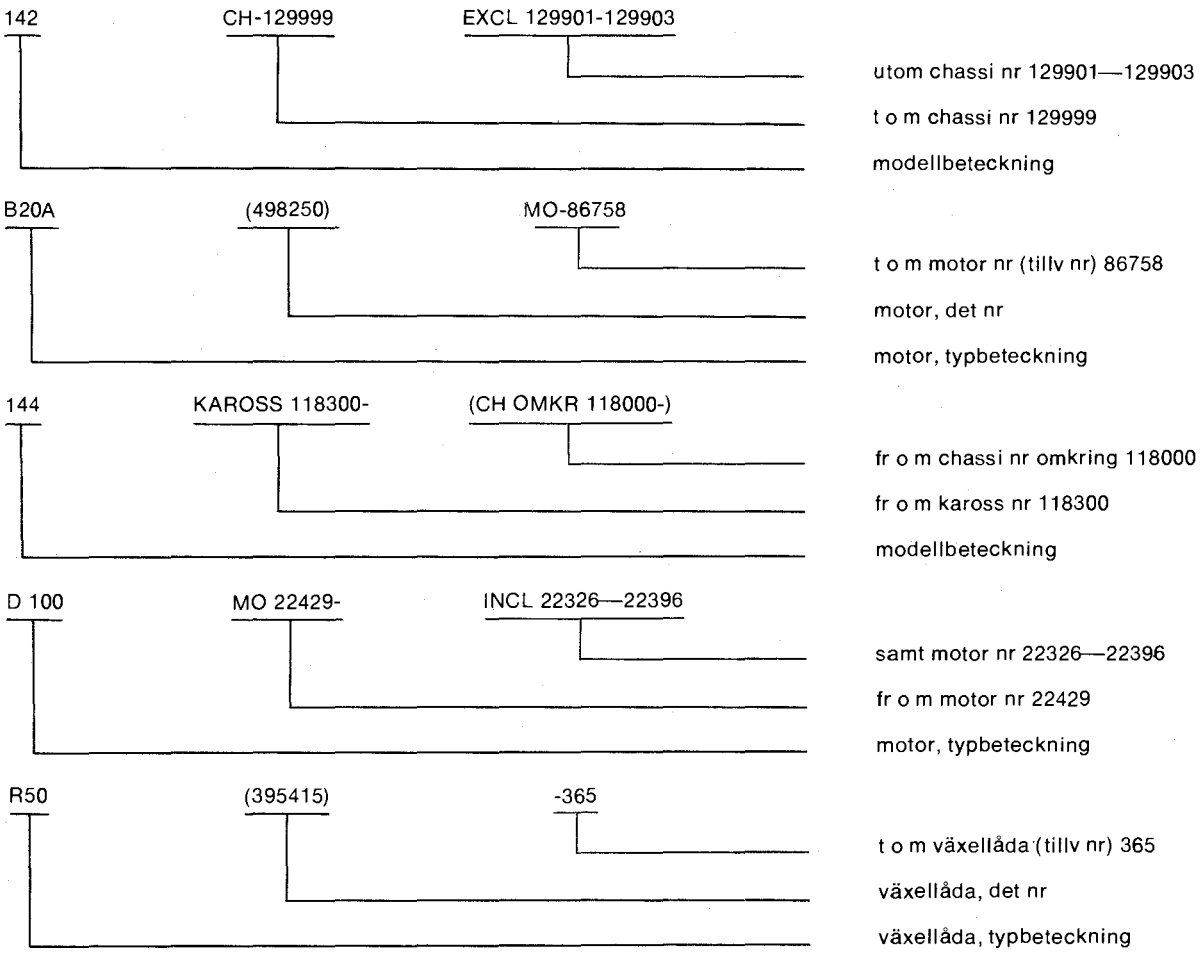

Reparationssatser:

Är den del av registret, som talar om vilka reparationssatser som finns till den eller de vagnstyper som är behandlade i katalogen. För att lättare kunna identifiera reparationssatserna, har gruppen illustrerats. För erhållande av uppgift på i satsen ingående delar, hänvisas till separat katalog över "Reparationssatser".

Förkortningar med förklaringar

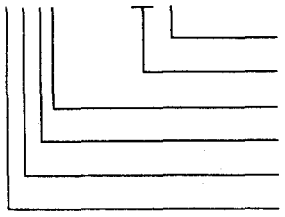

Förklaringar

På grund av platsbrist vid översättning till fyra språk av anmärkningar i form av noter etc, har ett sammandrag, benämnt "Förkortningar" (se sid 3) iordningställts. Dessa förkortningar som gäller för samtliga språk och således ej kommer att översättas, har uppställts i alfabetisk ordning, med utgångspunkt från svenska språket. Då noter av s k standardkaraktär använts, som anger chassinummer, motornummer och karosserinummer etc har dessa utformats enligt följande exempel:

Kodnyckel typbeteckningar

Exempel:
FB88 44T
NB88

[1]) Ej med vid vagn utan turbo.
[2]) Ej med vid 2-axlig vagn.

Katalogändringar

På baksidan av katalogens titelsida har införts en sida, benämnd "Införda ändringar". Denna sida har tillkommit för att möjliggöra uppföljning av att samtliga utsända ändringssatser insorterats i katalogen.

Med varje ändringssats bifogas en förteckning över utgående och tillkommande sidor. I denna förteckning är även angivet vilket nummer ändringssatsen har.

The appearance of the catalogue

The catalogue is divided into the groups shown on the main register. There is an index at the beginning of each group. There is a numerical register and a specification of repair kits at the end of the catalogue. The main register, indexes and repair kits list are multi-languaged (Swedish, English, French, German and Spanish).

The use of the catalogue

If you know where a part is located on the vehicle and want to know its part number, etc, open the catalogue at the relevant group for the main unit, to which the part in question pertains, in the group index. Note! Several varieties of the same unit can appear. When you have found the part concerned on the illustration note its key number and then find the equivalent key number on the text page opposite — where you will find the data relevant for ordering the part. If you only know the part number and want to find out the rest of the data required for making your order, first look at the numerical register. When you have located the Part No. in the register you will find reference to the Group, Page numbers and microfilm co-ordinate on the same line.. Turn to the page in question and then look down the "Part No." column until you find the part numer. The rest of the data on the same line is the data required for making your order. By comparing the key number on the text page with the equivalent key number on the illustration you can ascertain the location and function of the part in question.

What you should know about text pages

A page of text is divided into the columns shown below: 1. "**Fig.**" The figure number is a cross reference between the text and the illustration. 2. **"Qty."** The quantity is the quantity of the part concerned in the complete assembly, or subassembly. Parts which are sold by length, piping and hosing etc, are quoted as follows: In cases of lengths up to 99 mm we use the mm suffix, i. e. "99MM". On the other hand when it concerns lengths exceeding 100 mm, the figures appear without any suffix, i. e. "100". Should piping or hosing bearing the same part number appear in several locations within same assembly (illustration), lengths can also appear on the illustration. The lengths are then noted in parentheses in the immediate vicinity of the key number. 3. "**Part No.**" The part number must always be quoted in your orders for the part in question. 4. "**Description**" This column contains the descriptions which should be used when ordering the parts in question. These descriptions are quoted in both Swedish and English. If a part is included in a larger unit, it is displaced to the right below the name of the complete unit. When a complete unit is purchased all parts displaced to the right immediately below it, are included when the complete unit is ordered. 5. "**Kits**" The figures 1—4 in the kits column show the "stock holding grade" of the respective spare parts. The figure 1 shows the greatest stock holding grade, which means that the parts should be stocked primarily. The value of the grade declines successively to 4. Non-graded parts should only be stocked if consumption appears within the district. 8 = Shows that parts are not sold separately or as spares. O = Standard parts (screw, nuts, washer) which should be stocked. Parts marked with an O pertain to stock holding grade 1. S = Shows that the parts concerned is included in a repair kit. Parts of this sort should only be stocked separately in exceptional cases. Wherever possible the complete number of the kits has been noted in the section or group where they have their constructive location. In these cases, where it has not been possible to show the parts kit with its pertaining parts direct in the text, we have noted the kit nomber at the end of each section. For example if you look at Group 6, front axle and steering, and look for the parts required to replace a king pin, you will see that the part number for the king pin is marked with an S". Usually the kit is located under the complete unit. In exceptional cases it has been listed at the end of the text and illustration section. 6. "**Notes**" As well as reference to other pages, this column gives clarifying information of various types. A bracketed part number in this column shows that the part in question has been replaced by another part; the number which is currently in the part number column. This replacement only concerns the catalogue and component concerned. Notes, which are too lengthy to note in the notes column, have been marked 1, 2, 3) etc. These note numbers start with 1 within each catalogue group and can be found again as footnotes at the end of each section. The footnotes are written in Swedish, English, French, German, and Spanish. An "X" in the left hand margin shows that revision has occured in conjunction with the latest set of replacement pages.

What you should know about illustrated pages

The illustrations are usually composed of exploded views in perspective. In certain cases we use plans and sections based on the original drawings. The displacement system used in the text, see point 4, can also be traced on the illustrations owing to the fact that the key number of a complete unit is "clamped" together with its components parts. The key number of a complete unit has a ring around it.

What you should know about the register

The "Register" group is divided into two sub-divisions, the "Numerical Register" and "Repair Kits". These sub-divisions are clarified below:

Numerical Register

This page is divided into columns and sub-columns marked "Part number", "Group", "Page" and "microfilm-co-ordinate". This register will enable you to trace a part in the cataloque when you only know the part number and want further ordering data. When seeking a certain number in the register, first look at the "Part No." column. The Parts Nos. are listed in numerical sequence. On the same line as Part No., reference is made as to which group and page or the microfilm-co-ordinate, where the part in question can be seen in its own context. In cases where an individual part can be found in several parts of the catalogue the Part No. is only noted once and all the group and page numbers concerned, or microfilm-co-ordinate, are noted below it. If a part appears several times on the same page, the Part No., Group, Page and microfilm-co-ordinate is only noted once.

Repair' Kits

"Repair Kits" comprise that sub-division of the register which informs you as to which parts kits are stocked for the types of vehicles listed in the catalogue concerned. To facilitate the identification of repair kits this sub-division is illustrated. The individual parts included in the repair kit are listed in the Repair Kits Catalogue.

Abbreviations and clarification

Clarification

Owing to the amount of space being taken up by the fact that we shall be printing footnotes in five languages, we have tabled a list of Abbreviations" (see page 3). These abbreviations, which apply for all languages and thus will not be translated, have been listed in alpahabetical sequence, based on the Swedish language. When notes of a "standard" character appear, such a references to certain chassis and engine numbers, etc., they have been formed in the following way:

142 — type designation
CH-129999 — up to chassis No. 129999
EXCL 129901—129903 — except chassis Nos. 129901—129903

B20A — engine, designation
(498250) — engine, part number
MO-86758 — up to engine No. (Serial No.) 86758

144 — type designation
KAROSS 118300- — with effect body No. 118300
(CH OMKR 118000-) — with effect chassis No. 118000 approx.

D 100 — engine designation
MO 22429- — with effect from engine No. 22429
INCL 22326—22396 — and engines Nos. 22326—22396

R50 — Gearbox, designation
(395415) — Gearbox, Part No.
-365 — up to gearbox No. (Serial No.) 365

Code key, type designations

Example:
FB88 44T
NB88

FB88-44T

- FB — Forward controlled or normal controlled vehicles respectively.
- 8 — 3-axle vehicle[2])
- 8 — Design period
- N — Size of vehicle in relation to other vehicles
- B — Engine with supercharger[1])
- 44 — Wheel bases in decimeters
- T — Engine with supercharger[1])

[1]) Not with vehicles not fitted with supercharger.
[2]) Not with 2-axle vehicles.

Catalogue revisions

On the rear of the title page of the catalogue we have introduced a page called Catalogue amendments". This page is to facilitate the insertion of information regarding sets of replacement pages inserted in the catalogue.

Each set of replacement pages is accompanied by a list of superseded and supersessionary pages. This list is marked with an" Amendment number".

A	= ampére
ALT	= alternative
ANT KUGGAR	= number of teeth
B	= width

Disposition du catalogue

Le catalogue est divisé en groupes qui ressortent du registre. Au début de chaque groupe, il se trouve une table des matières. Un registre numérique ainsi qu'une liste des emballages de jeux sont placés à la fin du catalogue. Le registre, la table des matières ainsi qui la liste des jeux de reparation sont en cinq langues (suédios, anglais, français, allemand et espagnol).

Emploi du catalogue

Si l'on sait où un détail est placé et si l'on veut savoir son numéro de détail etc, on se reporte au groupe dans lequel le détail doit se trouver enregistré. A l'aide de la liste de contenu du groupe, on arrive à l'unité à laquelle le détail appartient. Remarque: Différents types du même appareil peuvent exister. Lorsque l'on a, sur la page d'illustration, trouvé le détail et par là le numéro de position du détail, on se reporte au même numéro de position sur la page correspondante de texte où les données nécessaires à la commande du détail sont obtenues. Si l'on ne connaît qu'un numéro de détail et que l'on veuille obtenir toutes les données pour une commande, il faut se référer au registre des numéros. Lorsque l'on a, dans le registre, trouvé le numéro de détail, on obtient sur la même ligne une indication permettant de se référer à un groupe déterminé, à une page ainsi qu'à une fiche-coordination. Cette référence conduit à la page de texte sur laquelle le numéro de détail se retrouve dans la colonne « no de dét ». Sur la même ligne que la numéro de détail se trouvent toutes les données nécessaires à la commande. En partant du numéro de position d'un détail au même numéro de position sur la page d'illustration correspondante, on peut connaître le placement du détail et sa fonction dans l'unité à laquelle il appartient.

Ce que l'on doit savoir de la page de texte

La page de texte est divisée en un certain nombre de colonnes désignées selon ce qui suit: 1. » **Pos** » Le numéro de position représente le lien entre des données de commande de détail sur la page de texte et le détail illustré sur la page d'illustration. 2. « **Quantité** » Ici, est donné le nombre d'un certain détail au sein de l'unité supérieure la plus proche. Les détails qui sont stockés par unité de longueur — tubes et tuyaux etc — sont mentionnés selon ce qui suit: à partir de 1—99 millimètres « 99 MM » et à partir de 100 millimètres et au-dessus « 100 ». Pour tubes et tuyaux de même dimension que l'on trouve à plusieurs endroits dans un même groupe d'installation (détail de figure), les longueurs sont, dans certains cas, même mentionnées sur l'image. Les longueurs sont écrites entre parenthèses immédiatement après le numéro de position. 3. « **No de dét** » Le numéro de détail doit être employé, lors de commande, sans être abrégé. 4. « **Désignation** » Dans cette colonne, doit être mentionnée la désignation qui doit être employée pour le détail en question lors de la commande. Les désignations sont mentionnées en suédois et en anglais. Si un certain détail appartient à une unité groupée plus élevée, la désignation du détail est déplacée sur la droite par rapport à la désignation de l'unité groupée. Lors d'achat d'unité groupée, suivent les détails qui sont déplacés sur la droite par rapport à l'unité groupée. 5. « **Jeu** » Les cehiffres 1—4 dans la colonne dé jeu donnent le « degré de stockage » des pièced détachées respectives. Le chiffre 1 désigne le « degré de stockage » le plus élevé, ce qui signifie que le détail doit en premier lieu être stocké. Le degré d'importance diminue progressivement jusqu'à ce que l'on arrive au chiffre 4 qui est le plus bas. Les pièces non classées ne doivent être stockées que si un écoulement documenté existe au sein du district. 8 = Mentionne que la pièce n'est pas vendue séparément ou comme pièce détachée. O = Désigne les détails standard (vis, écrous, rondelles) qui doivent être stockés. Les détails marqués de la lettre O appartiennent au degré de stockage 1. S = Indique que le détail fait partie d'un jeu de réparation. De tels détails ne doivent que dans des cas exceptionnels être stockés séparément. Dans la mesure où cela a été possible, le numéro complet des jeux a été mentionné dans les passages ou groupes où ils trouvent leur place. Dans les cas où il n'a pas été possible de présenter des jeux de réparations avec les pièces composantes directement dans le texte, le numéro complet du jeu a été mentionné en dernier dans chaque partie de texte. Si l'on se réfère par exemple au groupe 6 (essieu avant, direction) et que l'on cherche des détails pour l'échange d'un pivot de fusée, on trouve que le numéro de détail du pivot de fusée est marqué par le lettre «S». Le jeu se retrouve donc ordinairement comme unité complète en premier plan. A quelques exceptions près, il peut avoir été mentionné en dernier dans la même partie de texte ou de figure. 6. « **Remarques** » Outre des indications figurant en marge, cette colonne contient des détails complémentaires de différentes sortes. Dans cette colonne, les numéros de détails entre crochets, indiquent que le détail a été remplacé par le numéro se trouvant dans la colonne de numéros de détails. Ce remplacement n'est valable que dans les catalogues et positions en question. Les remarques, qui en raison du manque de place, ne peuvent figurer dans la colonne des remarques, ont, dans cette colonne, été indiquées selon l'exemple suivant: 1, 2, 3) etc. Ces chiffres de remarque commencent par le numéro 1 dans chaque groupe de catalogue et se retrouvent en annotations à la fin de chaque partie. Dans les annotations, les remarques sont écrites en suédois, anglais, français, allemand et espagnol. Un «X» dans la marge gauche de la page de texte indique où la modification a eu lieu lors du dernier changement de page.

Ce que l'on doit savoir de la page d'image

Les illustrations de la page d'image sont en général des dessins en perspectives. Dans certain cas, des images de plans et de sections sont employées comme base pour les dessins. Le principe de déplacement, voir page de texte point 4, peut même être identifié dans la figure de telle façon que le numéro de position du détail complet englobe avec des crochets les détails composants. L'unité complète est également marquée d'un rond autour d'un numéro de position.

Ce que l'on doit savoir du registre

Le groupe « registre » est divisé en deux sous-groupes: « registre numérique » et « jeux de réparation ». Ces deux groupes sont présentés ici:

Registre numérique

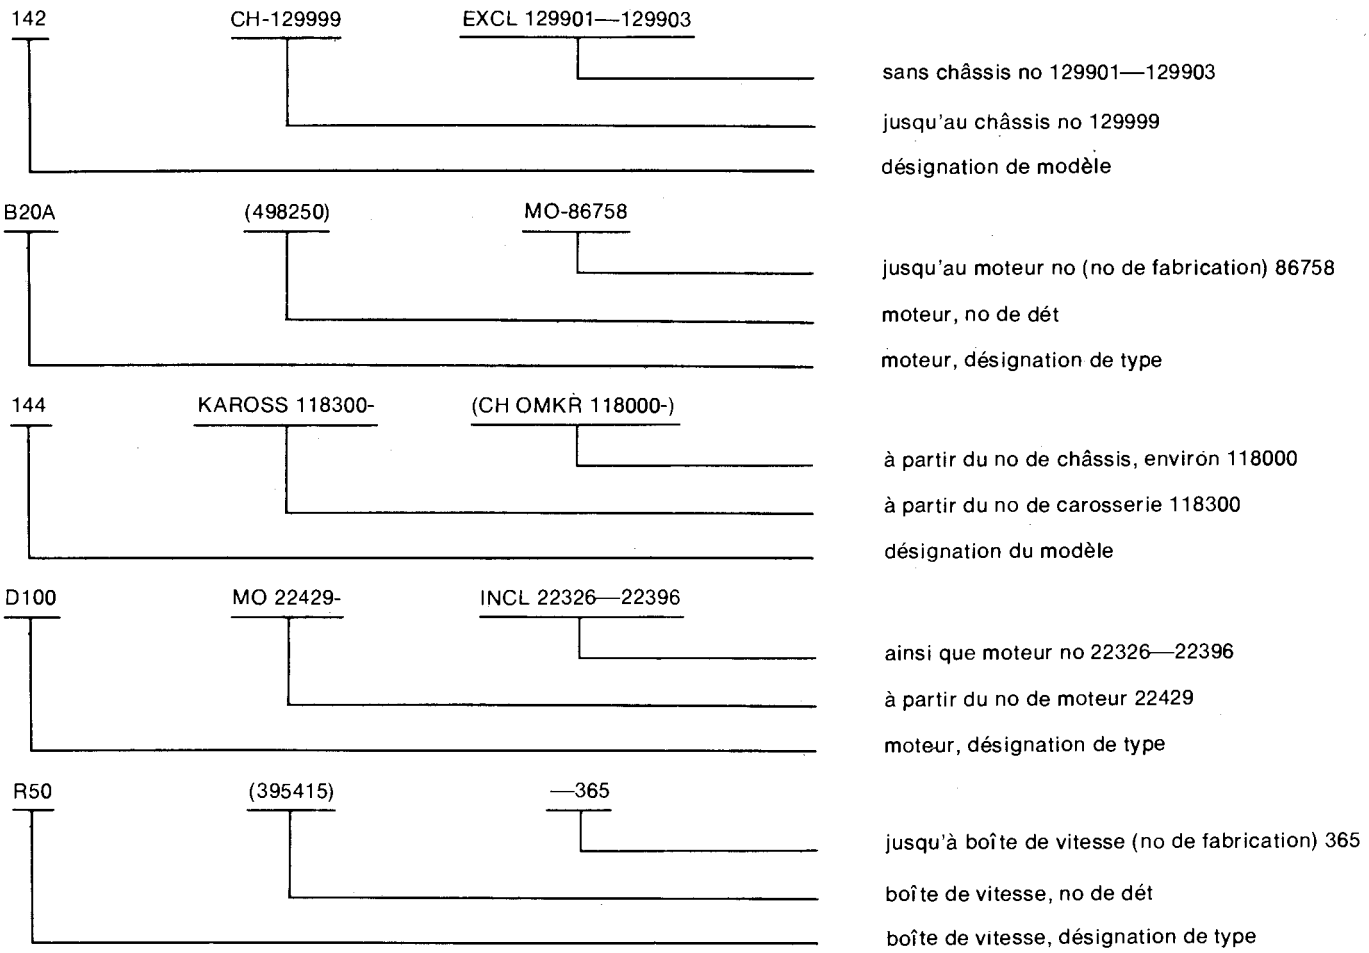

Le registre numérique est établi sous forme de tableau. Chaque page est divisée en colonnes: « No de référence », « Groupe », « Page » et « fiché-coordination ». Le registre numérique est particulièrement indiqué lorsqu'on ne connaît qu'un numéro de détail et que l'on veut obtenir des autres données de commande. Pour trouver un certain numéro dans le registre, il faut se référer à colonne « No de dét ». Les numéros de détails sont mentionnés par ordre numérique. Sur la même ligne que le numéro de détail, se trouvent des indications concernant le groupe et la page dans le catalogue où la fiche-coordination, là où la pièces en question peut être vue dans son ensemble. Dans les cas où détail apparaît à plusieurs endroits dans le catalogue, le numéro de détail n'est écrit qu'une fois et l'ensemble des numéros de groupes et de pages. No de groupe et de page ou fiche-coordination s'ecrivant ensuite. Si un détail apparaît plusieurs fois sur la même page, le numéro de détail, groupe, page et fiche-coordination seulement une fois.

Jeux de réparation

Les « jeux de réparation » sont une partie du registre qui indique quels sont les jeux de réparation disponibles pour celui ou ceux des types de véhicules qui sont traités dans le catalogue. Pour pouvoir plus facilement identifier les jeux de réparation, le groupe a été illustre. Pour obtenir des renseignements concernant les pièces faisant partie du jeu, voir catalogue spécial concernant les « jeux de reparations ».

Abréviations avec explications
Explications

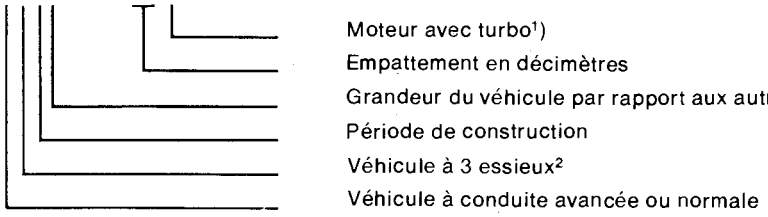

En raison du manque de place dû à la traduction en quatre langues des remarques sous forme de notes etc, un résumé portant la désignation « Abréviations » (voir page 4 a été établi. Ces abréviations qui sont valables pour l'ensemble des langues et qui, par conséquent, ne seront pas traduites, ont été établies par ordre alphabétique en partant de la langue suédoise. Comme des notes de caractère standard sont employées, notes désignant numéro de châssis, numéro de moteur et numéro de carosserie etc, celles-ci ont été présentées selon l'exemple suivant:

Code pour désignation de type

Exemple:

BB88
NB88 44T

[1]) Ne figure pas lorsqúil s'agit de véhicule sans turbo.
[2]) Ne figure pas lorsqu'il s'agit de véhicule à deux essieux.

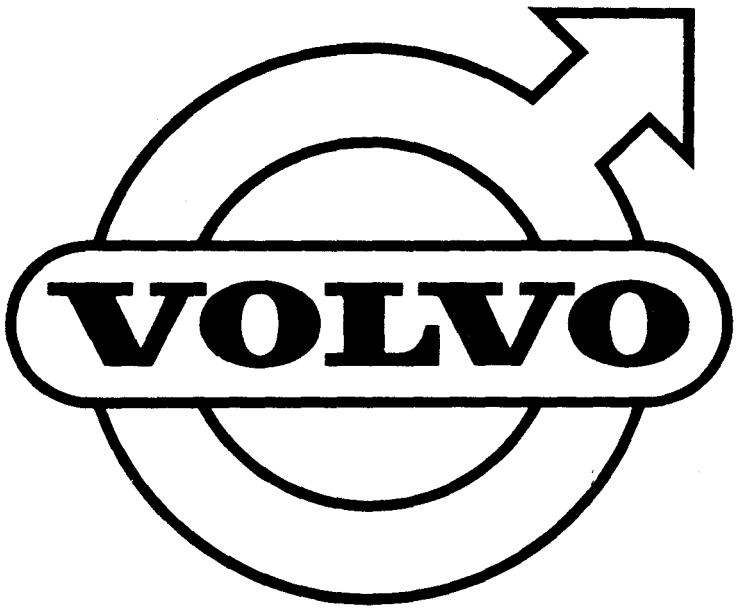

Modifications de catalogue

Au verso de la page de titre du catalogue, il a été introduit une page appelée « modifications apportées ». Cette page a pour but de contrôler que l'ensemble des jeux de remplacement envoyés est bien réparti dans le catalogue.

Avec chaque jeu de remplacement, se trouvent une liste des pages n'étant plus valables ainsi qu'une liste des pages de remplacement. Dans cette liste est même mentionné le numéro du jeu de remplacement.

A	= ampère
ALT	= alternative
ANT KUGGAR	= nombre de dents
B	= largeur
BAS	= version de base
BAT	= poids sous essieu arrière la charge, en tonne
BKH	= avec barre stabilisatrice arrière

Aufbau des Kataloges

Der Katalog ist — wie aus dem Registerblatt hervorgeht — in Gruppen eingeteilt. Vor jeder Gruppe befindet sich ein numeriches Register sowie ein Verzeichnis über Satsverpackungen finden Sie am Ende des Kataloges. Registerblatt, Inhaltsverzeichnisse sowie Verzeichnis über Satzverpackungen sind in fünf Sprachen angegeben (schwedisch, englisch, französisch, deutsch und spanisch).

Verwendung des Kataloges

Wenn man weiss, wo sich das gewünschte Teil befindet, und wenn man nach dessen Ersatzteilnummer usw. sucht, schaut man unter der Gruppe nach, in der das Teil enthalten sein sollte. Mit Hilfe des Inhaltsverzeichnisses der Gruppe sucht man dann die zusammengebaute Einhet, zu der das Teil gehört. ZUR BEACHTUNG! Es können von einem Aggregat verschiedene Ausführungen vorhanden sein. Wenn man auf der Bildseite das Teil und damit dessen Positionsnummer gefunden hat, geht man zu derselben Positionsnummer auf der entsprechenden Textseite über, wo sich die Angaben für die Bestellung des betreffenden Teiles befinden. Wenn lediglich die Ersatzteilnummer bekannt ist, aber weitere Daten für die Bestellung erforderlich sind, bedient man sich des Nummernregisters. Wenn man die Ersatzteilnummer im Register gefunden hat, erhält man auf derselben Zeile einen Hinweis auf eine bestimmte Gruppe, Seite und Mikrofilm-Koordinate. Der Hinweis bezieht sich auf die Textseite, auf der die Ersatzteilnummer in der Spalte „Ersatzteilnummer" zu finden ist. Auf derselben Zeile mit der Ersatzteilnummer sind die übrigen Daten für die Bestellung zu finden. Durch das Verfahren, von der Positionsnummer des gesuchten Teils zu derselben Positionsnummer auf der entgegengesetzten Bildseite überzugehen, erhält man Bescheid über die Anbringung des Teils sowie dessen Funktion in der zusammengebauten Einheit.

Was man wissen muss über die Textseite

Die Textseite ist in eine Anzahl Spalten mit den folgenden Bezeichnungen aufgeteilt: 1. „**Pos**" Die Positionsnummer ist die Verbindung zwischen der Bestellangabe eines Teils auf der Textseite und dem Teil selbst auf der Bildseite. 2. „**Antal**" (Anzahl) Hier ist die Anzahl eines bestimmten Teils innerhalb der nächsthöheren Einheit angegeben. Wenn es sich um Rohre oder Schläuche handelt, die pro Laufmeter vorrätig sind, ist die Bezeichnung wie folgt angegeben: Ab 1-99 mm „99MM" und ab 100 mm und darüber hinaus „100". Wenn solche Rohre oder Schläuche von derselben Abmessung auf mehreren Stellen innerhalb derselben Installationsgruppe (Bildabschnitt) vorkommen, wird auf die Abbildung hingewiesen, wo die Länge unmittelbar nach der Positionsnummer in Klammern angegeben ist. 3. „**Det nr**" Die Ersatzteilnummer ist bei der Bestellung ungekürzt zu verwenden. 4. „**Benämning**" (Bezeichnung) In dieser Spalte wird die Bezeichnung, die bei der Bestellung zu verwenden ist, angegeben. Die Bezeichnungen sind sowohl in schwedischer als auch in englischer Sprache angegeben. Wenn ein bestimmtes Teil in einer höheren zusammengesetzten Einheit enthalten ist, ist die Bezeihnung des Teils nach rechts verschoben, und zwar im Verhältnis zu der Bezeichnung der zusammengesetzten Einheit. Beim Kauf der zusammengesetzten Einheit werden auch die Teile, die im Verhältnis zu der zusammengesetzten Einhet nach rechts verschoben sind, mitgeliefert. 5. „**Sats**" (Satz) Die Ziffern 1-4 in dieser Spalte geben den Lagerhaltungsgrad des jeweiligen Ersatzteiles an. Die Ziffer 1 bezeichnet den höchsten Lagerhaltungsgrad, d. h. dass dieses Ersatzteil **in erster Linie** auf Lager zu halten ist. Der Wichtigkeitsgrad sinkt mit jeder Zahl bis auf 4 herab. Nicht klassifizierte Teile sollten nur auf Lager gehalten werden, wenn der Verbrauch innerhalb des Verkaufsbereichs wirklich statistisch feststeht. 8 = Wird nicht separat oder als Ersatzteil verkauft. O = Standard-Einzelteile (Schrauben, Muttern, Scheiben), die auf Lager zu halten sind. Mit „O" gekennzeichnete Teile sind unter Lagerhaltungsgrad 1 einzuordnen. S = Einzelteile, die zum Reparatursatz gehören. Solche Einzelteile sind lediglich in Ausnahmefälle getrennt auf Lager zu halten. Wo dies möglich war, ist die komplette Nummer der Sätze in den Abschnitt oder die Gruppe eingeführt worden, wo sie ihren konstruktiven Platz hat. Wenn es nicht möglich war, die Teile eines Reparatursatzes direkt im Text zu erwähnen, ist die komplette Nummer des Satzes am Ende jedes Textabschnittes angegeben worden. Nimmt man beispielsweise Gruppe 6 „Vorderachse, Lenkung" und sucht die Einzelteile zum Austausch von Achsschenkelbolzen, findet man, dass die Ersatzteilnummer des Bolzens mit einem „S" gekennzeichnet ist. Der Satz ist dann meistens als übergeordnete Kompletteinheit zu finden. In Ausnahmefällen ist der Satz am Ende des gleichen Text- und Bildabschnittes angegeben worden. 6. „**Anmärkning**" (Anmerkung) Ausser den Seitenhinweisen enthält diese Spalte erklärende Angaben verschiedener Art. Eine in dieser Spalte mit einer Klammer umgebene Ersatzteilnummer gibt an, dass das Teil durch eine nebenstehende Nummer in der Ersatzteil-Nummernspalte ersetzt worden ist. Dieser Ersatz bezieht sich nur auf den betreffenden Katalog und die Positionsnummer. Anmerkungen, die in der Spalte für Anmerkungen keinen Platz haben, sind in dieser Spalte lt. folgendem Beispiel gekennzeichnet worden: 1, 2, 3) usw. Diese Vermerkziffern beginnen mit Nr. 1 in jeder Kataloggruppe und stehen als Fussnoten am Ende jeden Abschnitts. In den Fussnoten stehen die Vermerke auf schwedisch, englisch, französich, deutsch und spanisch. Ein „X" am linken Rand der Textseite markiert, wo eine Änderung beim letzten Seitenwechsel durchgeführt worden ist.

Was man wissen muss über die Bildseite

Die Abbildungen der Bildseite bestehen zum grössten Teil aus Perspektivzeichnungen. In einigen Fällen werden Plan- und Sektionsbilder von der Zeichnungsunterlage verwendet. Das Stufenverschiebungsprinzip, siehe Textseite, Punkt 4, kann man auch in dieser Abbildung feststellen, und zwar weil die Positionsnummer eines kompletten Teils mit einer Klammer die Nummer der Unterteilung schliesst. Komplette Einheten werden auch mit einem Ring um die Positionsnummer markiert.

Was man wissen muss über das Register

Die „Register"-Gruppe ist in 2 Untergruppen aufgeteilt, und zwar „Nummernregister" und „Reparatursätze", die hier je für sich behandelt werden sollen.

Nummernregister

Das Nummernregister ist in Tabellenform aufgestellt und in Spalten aufgeteilt: „Det nr" = Ersatzteilnummer, „Grupp" = = Gruppe, „Sida" = Seite und „fiche-koordinat" = Mikrofilm-Koordinate. Das Nummernregister kommt besonders dann zur Anwendung, wenn man lediglich die Ersatzteilnummer kennt, aber die übrigen Bestelldaten wissen möchte. Um eine bestimmte Nummer im Register zu finden, sucht man in der Spalte „Det nr". Die Ersatzteilnummern sind in Nummernfolge aufgestellt. Auf derselben Zeile mit der Ersatzteilnummern findet man auch einen Hinweis auf die Gruppe und Seite oder die Mikrofilm-Koordinate, wo das betreffende Teil in seinem Zusammenhang zu finden ist. In den Fällen, wo ein Teil auf mehreren Stellen im Katalog vorkommt, wird die Ersatzteilnummer lediglich einmal geschrieben und sämtliche vorkommende Gruppen- und Seitennummern z. B. Mikrofilm-Koordinaten danach ausgeschrieben. Wenn ein Teil mehrmals auf einer Seite vorkommt, werden Ersatzteilnummer, Gruppe, Seite und Mikrofilm-Koordinate lediglich einmal ausgeschrieben.

Reparatursätze:

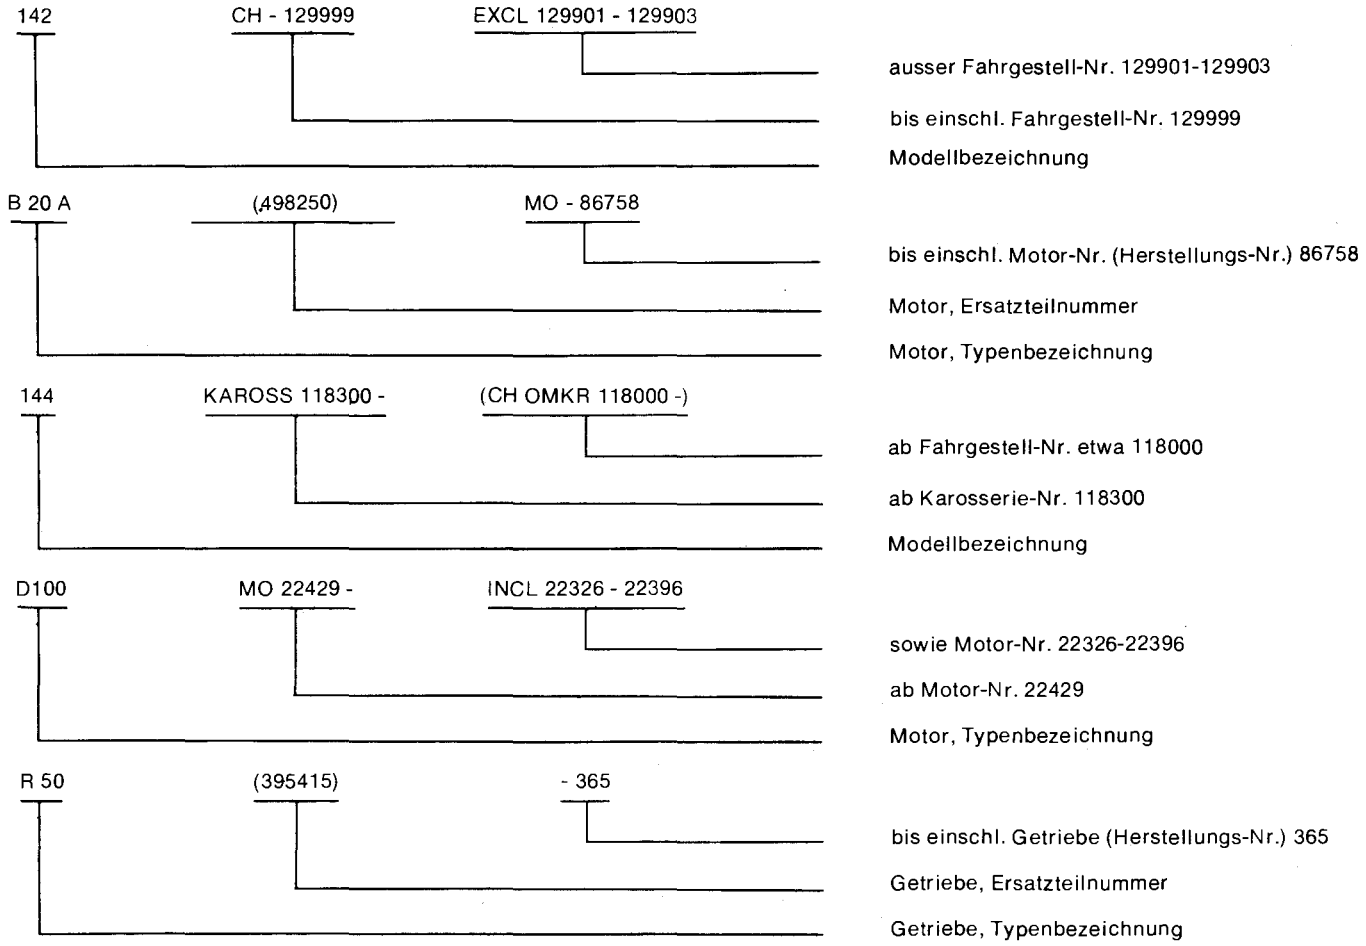

„Reparatursätze" ist der Teil vom Register, aus dem hervorgeht, welche Ersatzteilsätze in den in diesem Katalog behandelten Wagentypen vorkommen. Um leichter die Reparatursätze identifizieren zu können, ist die Gruppe illustriert worden. Um

über die zum Satz gehörenden Teile Auskunft zu bekommen, verweisen wir auf den separaten Katalog über „Reparationssatser".

Abkürzungen mit Erläuterungen

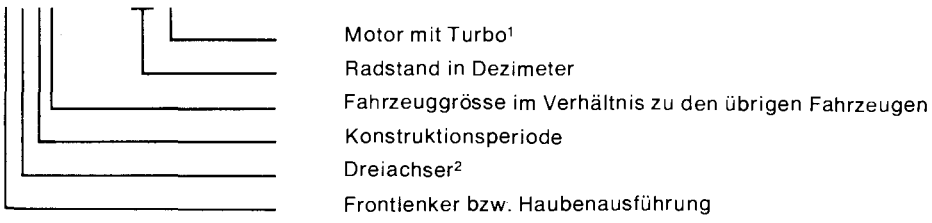

Erläuterungen

Durch Platzmangel bei der Übersetzung der Anmerkungen in vier Sprachen in Form von Abkürzungen haben wir eine Zusammenfassung, bezeichnet „Abkürzungen" (siehe Seite 4), eingeführt. Diese Abkürzungen, die für sämtliche Sprachen gelten, werden somit nicht übersetzt. Sie sind alphabetisch aufgeteilt mit Ausgang von der schwedischen Sprache. Sogenannte Normbezeichnungen wie Fahrgestell-Nr., Motor-Nr., Karosserie-Nr. usw. sind, wie folgende Beispiele zeigen, verwendet worden.

Kodeschlüssel Typenbezeichnungen

Beispiel:
FB 88 - 44T
NB 88

[1] Nicht beim Fahrzeug ohne Turbo.
[2] Nicht bei Zweiachsern.

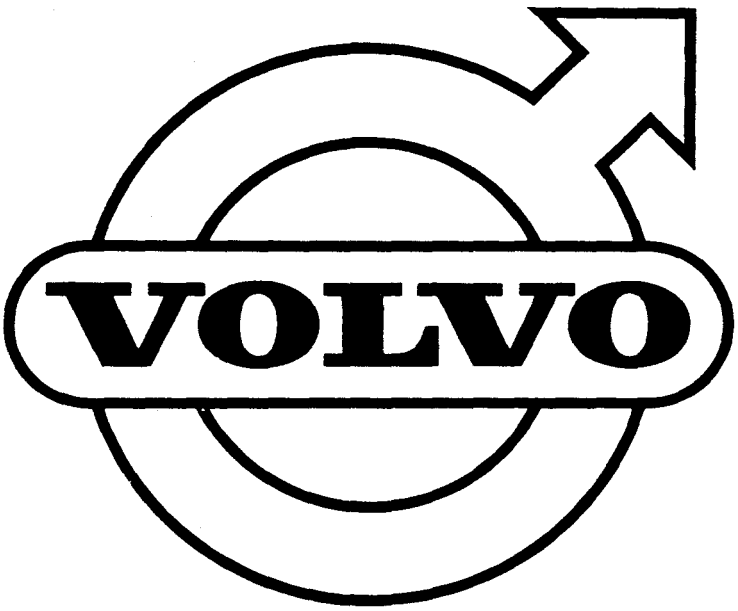

Katalogänderungen

Auf der Rückseite der Titelseite ist eine Seite, bezeichnet „Eingeführte Änderungen" eingeheftet. Diese Seite ist hinzugekommen, damit Sie leichter kontrollieren können, dass sämtliche Änderungssätze in den Katalog eingeheftet sind.

Jedem Änderungssatz wird ein Verzeichnis über Seiten, die neu hinzugekommen oder auszusörtieren sind, mitgeliefert. In diesem Verzeichnis ist auch die Nummer des Änderungssatzes angegeben.

A	= Ampere
ALT	= wahlweise
ANT KUGGAR	= Zähnezahl
B	= Breite
BAS	= Grundausführung
BAT	= Hinterachslast in ton angegeben

Estructura del catálogo

El catálogo está dividido en los grupos que se desprenden de la hoja de registro. Al comienzo de cada grupo existe un índice. Al final del catálogo se encuentra un registro numérico y una especificación de los empaques por juegos. La hoja de registro, los índices y la especificación sobre los empaques por juego se hallan impresas en cinco idiomas (sueco, inglés, francés, alemán y espanõl).

Empleo del catálogo

Si se desea saber dónde un detalle se encuentra colocado y cuál es su número de detalle, etc., se busca el grupo al cual el detalle pertenece. Con la ayuda del índice del grupo, se busca luego la unidad completa de la cual el detalle forma parte. NOTA! Pueden existir distintas variantes de un mismo grupo. Una vez que se ha localizado el detalle en la página ilustrada y consecuentemente el número de posición del detalle, se busca el número de posición en la página de texto correspondiente, donde se obtienen las informaciones necesarias para el pedido del detalle. Si únicamente se conoce el número de un detalle y se desea saber los restantes para su pedido, se emplea el registro numérico. Una vez que se ha encontrado el nro. de detalle en el registro, se localiza en la misma línea el grupo, la página y las coordenadas de microfilm donde se encuentra el detalle en cuestión. La referencia nos lleva a la página de texto en la cual el número de detalle se encuentra en la columna " Número de detalle". En el mismo renglón que el número de detalle se encuentran las informaciones necesarias para su pedido. Buscándose el número de posición de detalle en la página ilustrada opuestra, se sabe la ubicación del detalle como asimismo su función en el grupo cual pertenece.

Lo que se debe saber referente a la página de texto

La página de texto está dividida en un cierto número de columnas, denominadas de la siguiente manera: 1. **"Pos"** El número de posición constituye la relación entre los datos de pedido y un detalle en la página de texto y el detalle propiamente dicho en la página ilustrada. 2. **"Antal"** (Cantidad) Aquí se indica la cantidad de un detalle determinado que entra en la unidad inmediata superior. Las piezas o detalles que tenemos en stock por longitud como ser tubos, mangueras, etc., se indican de la siguiente manera: De 1 a 99 milímetros "99 mm" y a partir de 100 milimetros "100". Si existen tubos o mangueras de la misma demensión en distintos lugares en un mismo grupo de instalación (véase fig.), hacemos referencia a la fig. donde la longitud es indicada entre paréntesis en combinación con el número de posición. 3. **"Det nr"** (nro. de detalle) El número de detalle debe ser empleado en forma completa al formularse órdenes de pedido. 4. **"Benämning"** (Denominación) En esta columna se indica la denominación que debe emplearse para los detalles al formularse órdenes de pedidos. Las denominaciones están indicadas en sueco y en inglés. Si un cierto detalle forma parte de una unidad completa, la denominación del detalle está desplazada hacia la derecha en relación a la denominación del grupo completo. Al comprarse el grupo completo, los detalles que se encuentran desplazados nacia la derecha forman parte del suministro. 5. **"Sats"** (juego) Las cifras 1 a 4 en la columna de fuegos indican la " magnitud del stock" del repuesto correspondiente. La cifra 1 indica la magnitud más alta de stock, lo cual significa que la pieza correspondiente en **primer lugar** debe ser tenida en stock. La importancia de tener un detalle en stock baja correlativamente hasta 4. Las piezas no clasificadas deben únicamente tenerse en stock si se ha comprobado que en cierto distrito existe consumo de la pieza mencionada. 8 = Indica que el detalle no se vende separado o como repuesto. O = Piezas standard (tornillos, tuercas, arandelas) que deben ser tenidas en stock. Las piezas marcadas con O pertenecen a la magnitud de stock 1. S = Indica que la pieza forma parte de un juego de reparaciones. Estas piezas deben ser mantenidas en stock por separado tan sólo en casos excepcionales. En los casos en que ha sido posible, hemos señalado el número completo de los juegos en la sección o grupo donde tienen su sitio constructivo. En los casos donde no ha sido posible indicar un juego de reparación con sus piezas correspondientes directamente en texto, hemos incluido el número completo del juego al final del texto. Si por ejemplo miramos en el grupo 6 eje delantero, dirección y buscamos las piezas necesarias para el cambio del perno pivote, descubriremos que el número de detalle del perno pivote está marcato con una " S". El juego se encuentra entonces generalmente como unidad completa de más importancia. En casos excepcionales ésta ha sido también incluida al final del texto o de la ilustración. 6. **"Anmärkning"** (Observaciones) Además de las referencias de páginas, esta columna contiene datos informativos de distintas clases. Un número de detalle en esta columna que está señalado con una llave, indica que pieza ha sido sustituida por el número en la columna del número de detalle. Este reemplazo rige únicamente para el catálogo y la posición correspondiente. Las observaciones que por razones de espacio no pueden ser anotadas en la columna de observaciones, han sido marcadas en esta columna de acuerdo al siguiente ejemplo: 1, 2, 3) etc. Estas cifras de llmada empiezan con el número 1 dentro de cada grupo del catálogo y se encuentran como notas de pie de página al final de cada sección. En las notas de pie se escriben las observaciones en sueco, inglés, francés, alemán y español. Una "X" en el margen izquierdo de la hoja de texto marca dónde se ha realizado la modificación en el último cambio de páginas.

Lo que debe saberse acerca de la página con ilustraciones

Las ilustraciones consisten generalmente en dibujos en perspectiva. En ciertos casos se emplean planos y figuras de secciones. El principio del desplazamiento, véase la página de texto, punto 4, puede también ser descubierto en la figura ya que el número de posición de la unidad completa abarca los detalles componentes por medio de una llave. Una unidad completa se marca también con un hilo alrededor del número de posición.

Lo que se debe saber acerca del registro

El grupo "registro" está dividido en dos subgrupos, es decir registro alfabético", índice numérico" y juego de reparaciones", los cuales a continuación son tratados por separado.

Indice numérico

El índice numérico esta realizado en forma de tabla y se ha dividido en columnas: "Det nr", "Grupp", "Sida" y "fichekoordinat" ("Nro. de detalle", "Grupo", "Página" y "coordenadas de microfilm".) Para encontrase un número determinado en el índice, se busca la columna "Nr. de detalle". Los números de detalle estan anotados en orden numérico. En el mismo renglón que el número de detalle se encuentra la referencia al grupo y la página en el catálogo o las coordenadas de microfilm en las que el detalle esta ilustrado con el componente correspondiente. En los casos en que un detalle existe en varios lugares del catálogo, se escribe el número de detalle tan solo una vez anotandose luego todos los números de grupo, página o coordenadas de microfilm. Si un detalle existe varias veces en la misma página, se anota el nro. de detalle, el grupo, la página y las coordenadas de microfilm solamente una vez.

Juego de reparaciones

Los juego de reparaciones" es la parte del índice que nos dice cuales son los juegos de piezas de reparaciones que existen para el modelo, por los modelos de vehículos a los cuales se refiere el catálogo. Para poder identificar más fácilmente los juegos de reparaciones, se han ilustrado los grupos. Para la

obtención de una información de las piezas que componen el juego, hacemos referencial en un catálogo separado sobre el "Juego de reparaciones".

Abreviaciones y explicaciones
Explicaciones

Debido a la falta de espacio al realizarse la traducción a cuatro idiomas de las observaciones en forma de notas, etc., hemos realizado una recopilación denominada "Abreviaciones" (véase pag. 4). Estas abreviaciones que rigen para todos los idiomas y por tanto no serán traducidas, han sido colocades en orden alfabético en base al idioma sueco. En los casos en que se emplean notas de carácter standard que indican por ejemplo el número de chasis, el número del motor, el número de carrocería, etc., éstas han sido preparadas de acuerdo al siguiente ejemplo:

142 — designación de modelo

CH-129999 — hasta el chasis nro. 129999

EXCL 129901—129903 — exclusive chasis números 129901—129903

B 20 A — motor, designación de tipo

(498250) — motor, nro, de det.

MO-86758 — hasta el motor nro. (nro. de fabricación) 86758

144 — designación de modelo

KAROSS 118300- — a partir de la carrocería nro. 118300

(CH OMKR 118000-) — a partir del chasis nro. 118000

D 100 — motor, designación de tipo

MO 22429- — a partir del motor nro. 22429

INCL 22326—22396 — y los motores nro. 22326—22396

R 50 — caja de cambios, designación de tipo

(395315) — caja de cambios nro. de det.

-365 — hasta de la caja de cambios nro. (nro. de fabricación) 365

Llave de código, designaciones de tipo

Ejemplo:

FB88

NB88 44T

- 44T: Distancia entre ejes en decímetros
- NB88: Motor con turbocompresor[1]
- NB88: Tamaño del vehículo en relación a los demás vehículos
- NB88: Período de construcción
- NB88: Camión de tres ejes[2]
- NB88: Cabina corta o cabina larga

[1]) No mencionado en los motores sin turbocompresor.

[2]) No mencionado en los camiones de dos ejes.

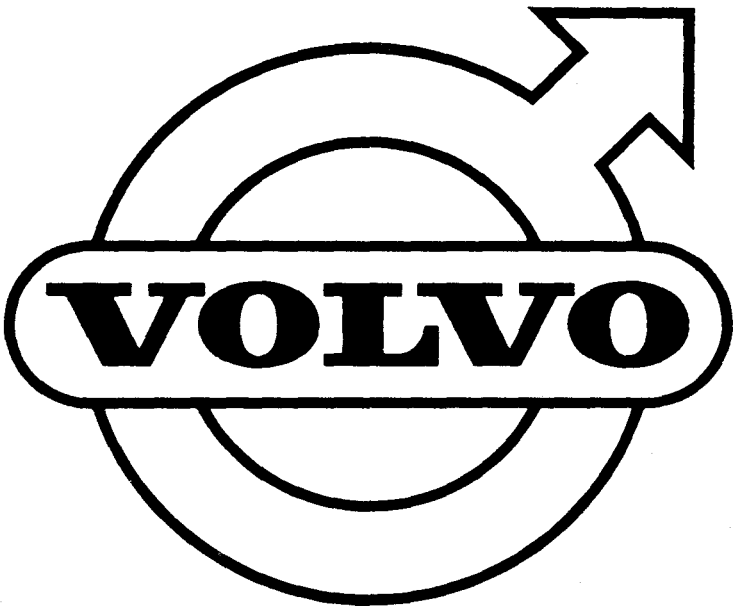

Modificaciones introducidas en el catálogo

Al dorso de la portada del catálogo se halla el título "Modificaciones introducidas". Esta página se ha incluido para que sea posible mantener el catálogo al día, controlándose que todos los juegos de modificaciones sean colocados en el catálogo.

Con cada juego de modificaciones se adjunta una especificación sobre las hojas eliminadas y las nuevas. En esta expecificación se indica también el número de juego de modificación.

A	= amperio
ALT	= alternativa
ANT KUGGAR	= número de dientes
B	= ancho
BAS	= versión base
BAT	= peso sobre eje trasero i ton
BKH	= con detrás barre de torsión
BLÅ	= azul
BLF	= suspensión por ballestas
CAN	= Canada
CH-XXXXX	= hasta el chasis nro
CH XXXXX-	= a partir del chasis nro
D	= diámetro, exterior
DET SE SIDA	= detalles componentes, véase pág.
DI	= diámetro, interior
DLAM	= de dos discos
DMG	= ballesta con muelle de goma
DUG	= ballesta sin muelle de goma
EBR	= sistema de frenos, marcado inglés
EEC	= Para vehículos a los países de la CEE
EH	= con ruedas de rayo
ELAM	= monodisco
EMG	= ballesta simple con muelle de goma
ERF	= cantidad necesaria, longitud necesaria etc
ERS AV	= reemplazado por
ET	= texto inglés
ETC	= etcétera
EXCL	= exclusive
FAV (BAS)	= Farvorit, Versión base
FBR	= sistema de frenos, marcado francés
FF	= resorte reforzado
FFA	= eje delantero adelantado
FS	= para coches con asiéntos delanteros individuales
FT	= presión eje delantero en toneladas
GRÅ	= gris
GUL	= amarillo
GV	= con palanca de cambios en el piso
H	= derecha
HASY	= luz asimétrica para palses con tráfico de circulación a la derecha
HJB	= distancia entre ejes
HMF	= velocímetro con registrador de viajes
HS	= para coches con asiento delantero enterizo
HST	= dirección a la derecha
HSTA	= dirección a la derecha, Australia
HSTB	= dirección a la izquierda, Inglaterra
HT	= techo elevado
HUF	= velocímetro sin registrador de viajes
HV	= camioneta rural
HYTT-XXXXX	= hasta la cabina nro.
HYTT XXXXX-	= a partir de la cabina nro.
INCL	= inclusive
KAROSS-XXXXX	= hasta la carrocería nro.
KAROSS XXXXX-	= a partir de la carrocería nro.
KBR	= equipo de freno para Francia, Allemagne y Benelux
KH	= cabina corta
KM	= kilómetro
KMPL	= completo
KOMB	= combinación de tapizado
L	= litros, longitud
LAGERFÖRES EJ	= no tenemos en stock como pieza de repuesto
LH	= cabina larga
LPF	= filtro de aire, elemento del papel
LUF	= con suspensión neumática
MA	= con freno a gases de escape
MAC	= con acondicionamiento de aire
MAJ	= con palanca de ajuste automática
MAR	= con purificador de gases de escape
MCOMBU	= preparado para acondicionamiento de aire
MDFA	= con eje delantero motriz
MDFS	= con enganche para semirremolque
MDS	= con blocaje de diferencial
MEB	= con puente trasero de reducción simple
MER	= con luna trasera eléctricamente calentada
METERVARA	= artículos por metro
MF	= con sistema aire fresco, de calefacción
MFP	= bastidor reforzado con Flitchplate
MFS	= con amortiguadores delanteros
MGF	= con fuelle de goma
MHR	= con mando manual
MK	= con toma de fuerza
MKMR	= provisto de contador de quilómetros
MLD	= con filtro de aire silenciador
MLF	= con precalentamiento del aire
MLV	= con válvula de freno sensible a la carga
MM	= milímetros
MMH	= con velocímetro mecánico
MNB	= con iluminación de placas
MNR	= con reductor de cubo
MO-XXXXX	= hasta el motor nro.
MO XXXXX-	= a partir del motor nro.
MPOS	= con ventilación de cárter positiva
MRA	= con tubo de retorno para los gases de escape
MS	= con servodirección
MSF	= con salpicaderos, delanteros
MST	= con camisa para el filtro de aire
MSTORK	= con limpia-faros
MSVK	= con acoplamiento de remolque
MTB	= con puente trasero de dos velocidades
MTL	= con techo corredizo
MTRF	= con ventilador termostáticamente regulado
MTV	= con calefacción adicional
MV	= con calefactor
MVA	= con múltiple de escape con camisa de agua
MVFD	= con distribuidor de peso
MÄRKT	= marcado
NF	= ventilador standard
NFA	= eje delantero de cubicación normal
NR	= número
NT	= techo de altura normal
OBF	= filtro de aire en baño de aceite
OMKR	= alrededor del nro.
RAD	= bomba de inyección tipo elementos en línea
ROR	= bomba de inyección de tipo rotativo
ROT	= indice de octano (metodo Research)
RV	= con palanca de cambios bajo al volante
RÖD	= rojo
S	= forma parte del empaque por juego
SBMR	= correa de seguridad con rodillos
SBN	= frenos tipo sueco para los Países Bajos
SBR	= sistema de frenos, mercado general
SBUR	= correa de seguridad sin rodillos
SE GRUPP	= véase grupo
SE POS	= véase posición
SE SIDA	= véase pág.
SEN UTF	= producción posterior
SH	= con ruedas de disco
SM	= mercado sueco
SPEC UTF	= ejecución especial

SPV	= vía

1. Vid åtgärd på B30E skall cylinderlocket ersättas av ett för B30F. Cylinderlockspackningar och tätningsringar enligt anvisning för B30F. When processing a B30E the cylinder head must be replaced by a cylinder head for the B30F. The cylinder head gaskets and seal rings should be used in accordance with the instructions for B30F engines. Lors de mesures prises sur le B30E, la culasse doit être remplacée par une culasse pour B30F. Les joints de culasses et rondelles d'étanchéité doivent être employés selon les indications concernant le B30F. Bei Massnahmen am B30E–Motor soll der Zylinderkopf durch einen B30F–Zylinderkopf ersetzt werden. Zylinderkopfdichtungen und Dichtungsringe werden lt. Anweisungen für den B30F–Motor verwendet. Al hacer reparaciones en los motores B30E la culata deberá substituirse por la correspondiente a los motores B30F. Las juntas de culata y anillos retén se utilizarán de acuerdo a las instrucciones correspondientes a los motores B30F.

24. Beställning av ingående detaljer skall göras med ledning av bakaxelns märkning och utväxlingsförhållande. Parts component must be ordered in accordance with the marking on the rear axle and the ratio. La commande des pièces de rechange s'y rapportant doit se faire en se référant au code d'identifikation et au rapports du pont. Bei Bestellung von Einzelbestandteilen sind Kennzeichnung und Untersetzung des Hinterachsgetriebes zu berüsichtigen El pedido de piezas deberá hacerse de acuerdo al marcado y a la relacion de engranajes del puente trasero.
25. För bakaxlar märkta 255545, 255525. For rear axle marked 255545, 255525. Pour ponts arrière marqués 255545, 255525. Für Hinterachsen mit Erkennung 255545, 255525. Para puentes traseros marcados 255545, 255525.
26. För bakaxlar märkta 255699, 255700, 255754, 255755, 255767, 255784, 255785, 255786. For rear axle marked 255699, 255700, 255754, 255755, 255767, 255784, 255785, 255786. Pour ponts arrière marques 255699, 255700, 255754, 255755, 255767, 255784, 255785, 255786. Für Hinterachsen mit Erkennung 255699, 255700, 255754, 255755, 255767, 255784, 255785, 255786. Para puentes traseros marcados 255699, 255700, 255754, 255755, 255767, 255784, 255785, 255786.

			stötdämpare	shock absorber			[illegible]

22. Monteras vid övergång från tidigare till senare utförande av stötdämpare. Installed in conjunction with transition from earlier to late production shock absorbers. Doit être monté lorsqu'un amortisseur d'ancienne version est remplacé par un nouvel amortisseur. Wird beim Übergang von der alten auf die neue Stossdämpferausführung montiert. Se monta al hacer el cambio de silenciador de antiguo modelo al nuevo.

4. För övriga i komplett bakaxel ingående detaljer se motsvarande standard bakaxlar enligt ovanstående tabell. For other parts component to complete rear axles see the corresponding standard rear axles according to the above table.
Pour les autres pièces faisant partie du pont arrière complet, voir ponts arrière standards correspondants selon le tableau ci–dessus. Übrige Teile, die zur kpl. Hinterachse gehören, siehe entsprechende Standardhinterachsen lt. obiger Tabelle. Para las demás piezas componentes del eje trasero completo véanse los correspondientes ejes standard, según la tabla indicada arriba.

1. Vid byte från 687368 och 687369 till 1212114 0ch 1212115 måste även ankarbult 1212113, skruv 955549 och bricka 941909 monteras. When replacing 687368 and 687369 with 1212114 and 1212115 we would like to point out that anchorage bolt 1212113, screw 955549 and washer 941909 are also required. Lors de remplacement de 687368 et 687369 à 1212114 et 1212115 le boulon d'ancrage 1212113, la vis 955549 et la rondelle 941909 doivent même être montés. Werden die Teile 687368 und 687369 durch die Teile 1212114 und 1212115 ausgetauscht, müssen auch der Ankerbolzen 1212113 die Schraube 955549 und die scheibe 941909 montiert werden. Al hacer cambio de los 687368 y 687369 a los 1212114 y 1212115 deberán montarse los pernos de anclaje 1212113, tornillos 955549 y arande 941909.
2. Ej standardutrustning. Optional extra. N'est pas equipement standard. Nicht serienmässig. No forma parti del equipo standard.

1. Låscylindersats bestående av 4 st låscylindrar (dörr V och H, baklucka samt handskfack) med 2 st gemensamma nycklar beställes under det nr 676608–3. Lock cylinder kit consisting of 4 lock cylinders (left and right doors, luggage compartment and glove box) with two common keys has Kit No. 676608–3. Le jeu de cylindres de fermeture se compose de 4 cylindres de fermeture (porte G et D, porte de coffre à bagages et boi te à gants) ayant 2 clés communes. Ces cylindres de fermeture sont commandés le no de dét. 676608–3. Des Schlosszylindersatz besteht aus 4 Schlosszylindern (Tür links und rechts, Kofferaumdeckel sowie Handschuhkasten) mit 2 gemeinsamen Schlüsseln sind unter der Ersatzteilnummer 676608–3 zu bestellen. El juego, del cilindro de carradura se compone de 4 cilindros de carradura (puertas izq. y der., tapa baúl y guantera), con 2 llaves comunes. Se solicita bajo el número de detalle 676608–3.
2. Ofärgat glas. Clear glass. Verre non coloré. Klarglas. Christal incoloro.
3. Färgat glas. Tinted glass. Verre coloré. Gefärbtes Glas. Cristal de color.
21. Låscylindersats bestående av 4 st låscylindrar (dörr V och H, baklucka samt handskfack) med 2 st gemensamma nycklar beställes under det nr 1213540. Lock cylinder kit concisting of 4 lock cylinders (left and right doors, luggage compartment and glove box) with two common keys has Kit No. 1213540. Le jeu de cylindres de fermeture se compose de 4 cylindres de fermeture (porte G et D, porte de coffre à bagages et boîte à gants) ayant 2 clés communes. Ces cylindres de fermeture sont commandés sous le no de dét. 1213540. Des Schlosszylindersatz besteht aus 4 Schlosszylindern (Tür links und rechts, Kofferraumdecke sowie Handschuhkasten) mit 2 gemeinsammen Schüsseln sind unter der Ersatzteilnummer 1213540 zu bestellen. El juego del cilindro de carradura se compone de 4 cilindros de carradura (puertas izq. y der., tapa baúl y guantera), con 2 llaves comunes. Se solicita bajo el número de detalle 1213540.
24. För glas tj=4,8 mm. For glass Th=4.8 mm. Pour épaisseur de verre=4,8 mm. Für Glas, D=4,8 mm. Para cristal, espesor=4,8 mm.
25. För glas tj=4,2 mm. For glass Th=4.2 mm. Pour épaisseur de verre=4,2 mm. Für Glas, D=4,2 mm. Para cristal, espesor=4,2 mm.

1. Låscylindersats bestående av 4 st låscylindrar (dörr V och H, baklucka samt handskfack) med 2 st gemensamma nycklar beställes under det nr 676608–3. Lock cylinder kit consisting of 4 lock cylinders (left and right doors, luggage compartment and glove box) with two common keys has Kit No. 676608–3. Le jeu de cylindres de fermeture se compose de 4 cylindres de fermeture (porte G et D, porte de coffre à bagages et boi te à gants) ayant 2 clés communes. Ces cylindres de fermeture sont commandés le no de dét. 676608–3. Des Schlosszylindersatz besteht aus 4 Schlosszylindern (Tür links und rechts, Kofferaumdeckel sowie Handschuhkasten) mit 2 gemeinsamen Schlüsseln sind unter der Ersatzteilnummer 676608–3 zu bestellen. El juego, del cilindro de carradura se compone de 4 cilindros de carradura (puertas izq. y der., tapa baúl y guantera), con 2 llaves comunes. Se solicita bajo el número de detalle 676608–3.
21. Låscylindersats bestående av 4 st låscylindrar (dörr V och H, baklucka samt handskfack) med 2 st gemensamma nycklar beställes under det nr 1213540. Lock cylinder kit concisting of 4 lock cylinders (left and right doors, luggage compartment and glove box) with two common keys has Kit No. 1213540. Le jeu de cylindres de fermeture se compose de 4 cylindres de fermeture (porte G et D, porte de coffre à bagages et boîte à gants) ayant 2 clés communes. Ces cylindres de fermeture sont commandés sous le no de dét. 1213540. Des Schlosszylindersatz besteht aus 4 Schlosszylindern (Tür links und rechts, Kofferraumdecke sowie Handschuhkasten) mit 2 gemeinsammen Schüsseln sind unter der Ersatzteilnummer 1213540 zu bestellen. El juego del cilindro de carradura se compone de 4 cilindros de carradura (puertas izq. y der., tapa baúl y guantera), con 2 llaves comunes. Se solicita bajo el número de detalle 1213540.
